Who's Crazy Here? is a concise guide for people seeking options to psychiatric drugs. Author Gracelyn Guyol ended her bipolar disorder in 2002 by addressing its underlying causes instead of treating the symptoms forever with drugs. When readers of her first book confessed difficulty "wading through" the length and science in most health books, Gracelyn created this 113 page guide to recovery from ADD/ADHD, Addiction, Eating Disorders, Anxiety, PTSD, Depression, Bipolar Disorder, Schizophrenia, and Autism. Part I covers remedies for the most frequent causes of mental dysfunction: inadequate brain fuel, nutrient imbalances, disruptive substances, four "genetic quirks," flawed digestion, food allergies/sensitivities, environmental toxins, and emotional trauma. Chapters in Part II focus on a specific diagnosis and its unique causes. Innovative practitioners are introduced who have developed effective, drug-free treatments. Each chapter concludes with bulleted Steps to Recovery to discuss with your holistic practitioner. Since it can be difficult to locate doctors trained to treat mental illness without drugs, Chapter 1 provides key words, web sites, and tips for finding one using the Internet. For readers who want more scientific data and details, DVDs, books, and web sites are recommended throughout. Learn about practitioners using methods developed by the late Abram Hoffer, MD, PhD, who enabled 75% of his schizophrenic patients to live "normal" lives. Discover the clinic that ended Gracelyn's bipolar mania in just four months, which has been helping mental patients for two decades. Most addiction programs achieve long-term abstinence for only 3-10%. The approach Gracelyn recommends that addresses the physical causes of addiction enjoys 60-74% success. Even children with autism, the most complex disorder, frequently recover. Explore how holistic treatments can help you or a loved one restore mental health.
