In 1905 Mina Benson Hubbard became the first white woman to cross Labrador, completing the expedition that had led to her husband's death. *The Woman Who Mapped Labrador* makes available for the first time the unguarded and personal diary that was the basis for her famous book, *A Woman's Way Through Unknown Labrador*. Three specialists have combined their expertise to enhance the richness of this original source. Roberta Buchanan's annotation of Hubbard's expedition diary makes it accessible to contemporary readers. Anne Hart's biography illuminates an Edwardian woman's transformation from teacher, nurse, and devoted wife to courageous explorer and social activist. Bryan Greene's discussion of Hubbard's navigational, cartographic, and topographical techniques shows her to have been a serious explorer. His nineteen newly drawn maps make it possible to follow her journey in detail.
