**Earth is gone.**

Centuries have passed since life ended on the blue planet. Humanity's survivors are now dispersed among distant colonies, thousands of light years from the barren, frozen rock that was once their home.

At a time when power means everything, the ultimate power, the imperium, rests with the Consulate Magistratus. In return for its protection, citizens must concede their rights absolutely. The Magistratus controls interstellar travel, access to technology, even procreation. Every citizen is implanted with a device to monitor their location, health and emotions. Freedom, religion and self-determination are anachronisms. Humanity's true history survives only in whispers of a secret archive.

Yet there are those who preach a new religion and who want to be free.

A revolution is coming...

## **The Heretic**

In the cold of a winter's night, a small village is the subject of a brutal attack. A fourteen-year-old boy, Jordi, sees armed men approaching and manages to wake his family. He and a handful of survivors flee into the frozen, snow-covered forest to wait for the preacher who told them their way of life was based on lies.

Shepherd, a freighter-tramp and smuggler, is commissioned to deliver illicit medical supplies to a hostile border planet near the Wall. He is dragged into a fight he does not believe in and a desperate struggle to protect his ship, his way of life and the lives of the persecuted few who seek only freedom.

## **Defiance**

The murder of a man in the lowest caste is seen as inconsequential, but Weaver, one of the few Caesteri lawmen who still believes in justice, refuses to ignore it. Fighting his own indoctrination, and the voice inside his mind that forces him to ignore his conscience, he follows the trail of evidence all the while struggling to hang on to the thin thread of his humanity.

The killer he hunts is violent and unstable, and haunted by her own callous ghosts. A woman who sells her body to fuel her drug addiction. She possesses an almost supernatural ability to navigate the wormholes which connect humanity's distant colonies - an ability the Magistratus fears and must eradicate. Weaver will follow her to a planet the Magistratus has abandoned, where the only law is that of criminals. And then to the furthest reaches of space, where the truth that awaits them leads to the corrupt heart of the Republic - a truth the Magistratus will do anything to conceal.

**The Heretic and Defiance are the bestselling first two books in a longer tale spanning four volumes.**

The award-winning Beyond the Wall series is gripping, epic space opera, written as hard science-fiction. It is the story of humanity's future and the discovery of the truth of its past.
