Performance Evaluation Software: Moving Object Detection and Tracking in Videos introduces a software approach for the real-time evaluation and performance comparison of the methods specializing in moving object detection and/or tracking (D&T) in video processing. Digital video content analysis is an important item for multimedia content-based indexing (MCBI), content-based video retrieval (CBVR) and visual surveillance systems. There are some frequently-used generic algorithms for video object D&T in the literature, such as Background Subtraction (BS), Continuously Adaptive Mean-shift (CMS), Optical Flow (OF), etc. An important problem for performance evaluation is the absence of any stable and flexible software for comparison of different algorithms. In this frame, we have designed and implemented the software for comparing and evaluating the well-known video object D&T algorithms on the same platform. This software is able to compare them with the same metrics in real-time and on the same platform. It also works as an automatic and/or semi-automatic test environment in real-time, which uses the image and video processing essentials, e.g. morphological operations and filters, and ground-truth (GT) XML data files, charting/plotting capabilities, etc. Along with the comprehensive literature survey of the abovementioned video object D&T algorithms, this book also covers the technical details of our performance benchmark software as well as a case study on people D&T for the functionality of the software.

From reader reviews:

John Moore:

Book is to be different for each and every grade. Book for children right up until adult are different content. We all know that that book is very important for all of us. The book Performance Evaluation Software: Moving Object Detection and Tracking in Videos (SpringerBriefs in Computer Science) ended up being making you to know about other know-how and of course you can take more information. It is rather advantages for you. The guide Performance Evaluation Software: Moving Object Detection and Tracking in Videos (SpringerBriefs in Computer Science) is not only giving you a lot more new information but also to be your friend when you feel bored. You can spend your current spend time to read your publication. Try to make relationship while using book Performance Evaluation Software: Moving Object Detection and Tracking in Videos (SpringerBriefs in Computer Science). You never really feel lose out for everything should you read some books.

Kyle Coffman:

The book Performance Evaluation Software: Moving Object Detection and Tracking in Videos (SpringerBriefs in Computer Science) will bring one to the new experience of reading a book. The author style to clarify the idea is very unique. If you try to find new book to read, this book very appropriate to you. The book Performance Evaluation Software: Moving Object Detection and Tracking in Videos (SpringerBriefs in Computer Science) is much recommended to you to see. You can also get the e-book from your official web site, so you can more readily to read the book.

Elsie Canada:

Performance Evaluation Software: Moving Object Detection and Tracking in Videos (SpringerBriefs in Computer Science) can be one of your beginner books that are good idea. Many of us recommend that straight away because this e-book has good vocabulary that could increase your knowledge in vocabulary, easy to understand, bit entertaining but delivering the information. The article author giving his/her effort that will put every word into pleasure arrangement in writing Performance Evaluation Software: Moving Object Detection and Tracking in Videos (SpringerBriefs in Computer Science) although doesn't forget the main stage, giving the reader the hottest as well as based confirm resource information that maybe you can be considered one of it. This great information could drawn you into brand new stage of crucial considering.

Blake Nixon:

That book can make you to feel relax. This specific book Performance Evaluation Software: Moving Object Detection and Tracking in Videos (SpringerBriefs in Computer Science) was colorful and of course has pictures around. As we know that book Performance Evaluation Software: Moving Object Detection and Tracking in Videos (SpringerBriefs in Computer Science) has many kinds or type. Start from kids until teenagers. For example Naruto or Private investigator Conan you can read and feel that you are the character

on there. So , not at all of book are make you bored, any it offers you feel happy, fun and relax. Try to choose the best book for yourself and try to like reading in which.
