Advances and Technical Standards in Neurosurgery (Volume 10) H. Krayenbühl, J. Brihaye, F. Loew, S. Mingrino, B. Pertuiset, L. Symon, H. Troupp, M. G. Ya?argil

As an addition to the European postgraduate training system for young neurosurgeons we began to publish in 1974 this series devoted to Advances and Technical Standards in Neurosurgery which was later sponsored by the European Association of Neurosurgical Societies. The fact that the English language is well on the way to becoming the international medium at European scientific conferences is a great asset in terms of mutual understanding. Therefore we have decided to publish all contributions in English, regardless of the native language of the authors. All contributions are submitted to the entire editorial board before publication of any volume. Our series is not intended to compete with the publication of original scientific papers in other neurosurgical journals. Our intention is, rather, to present fields of neurosurgery and related areas in which important recent advances have been made. The contributions are written by specialists in the given fields and constitute the first part of each volume. In the second part of each volume, we publish detailed descriptions of standard operative procedures, furnished by experienced clinicians; in these articles the authors describe the techniques they employ and explain the advantages, difficulties and risks involved in the various procedures. This part is intended primarily to assist young neurosurgeons in their postgraduate training. However, we are convinced that it will also be useful to experienced, fully trained neurosurgeons.

From reader reviews:

Shane Ward:

Information is provisions for individuals to get better life, information presently can get by anyone from everywhere. The information can be a understanding or any news even a concern. What people must be consider while those information which is inside former life are hard to be find than now's taking seriously which one is suitable to believe or which one the actual resource are convinced. If you find the unstable resource then you have it as your main information you will have huge disadvantage for you. All of those possibilities will not happen within you if you take Advances and Technical Standards in Neurosurgery (Volume 10) as your daily resource information.

Tyler Smith:

The particular book Advances and Technical Standards in Neurosurgery (Volume 10) will bring you to the new experience of reading a new book. The author style to describe the idea is very unique. In case you try to find new book you just read, this book very acceptable to you. The book Advances and Technical Standards in Neurosurgery (Volume 10) is much recommended to you to read. You can also get the e-book through the official web site, so you can more readily to read the book.

Carrie Mathis:

People live in this new moment of lifestyle always try to and must have the time or they will get lots of stress from both everyday life and work. So , whenever we ask do people have spare time, we will say absolutely without a doubt. People is human not just a robot. Then we inquire again, what kind of activity are there when the spare time coming to an individual of course your answer can unlimited right. Then do you ever try this one, reading publications. It can be your alternative throughout spending your spare time, the particular book you have read will be Advances and Technical Standards in Neurosurgery (Volume 10).

Joan James:

As a pupil exactly feel bored to help reading. If their teacher inquired them to go to the library as well as to make summary for some guide, they are complained. Just little students that has reading's heart or real their passion. They just do what the professor want, like asked to the library. They go to generally there but nothing reading significantly. Any students feel that reading through is not important, boring along with can't see colorful photographs on there. Yeah, it is to become complicated. Book is very important for you. As we know that on this age, many ways to get whatever you want. Likewise word says, many ways to reach Chinese's country. So , this Advances and Technical Standards in Neurosurgery (Volume 10) can make you really feel more interested to read.
