**Movement Disorders Differential Diagnosis** Roongroj Bhidayasiri, Hubert Fernandez

Movement Disorders - Parkinson's, Essential Tremor, Dystonia, etc. - are some of the most common but hardest to definitively diagnose conditions seen by the neurologist. This book complements the popular *Neurological Differential Diagnosis*, supplying the practitioner with a similarly vital tool, and following a similar pattern highlighting common and serious conditions first. This guide allows deeper exploration of issues specific to movement disorders and so will be of use to both the experienced and trainee neurologist who wishes to specialize in movement disorders.
