Society is at a crossroads. We can either continue on the path of consumption at any cost, or we can make new choices that will lead to a happier, more rewarding life, while helping to preserve the planet for future generations.

Collaborative consumption is a new way of living, in which access is valued over ownership, experience is valued over material possessions, and "mine" becomes "ours," so everyone's needs can be met without waste.

*Sharing is Good* is your road map to this emerging economic paradigm.

Discover:

- The history and development of collaborative consumption
- The benefits and challenges of a sharing lifestyle
- A wealth of resources from around the world to help make sharing easy and safe

The beauty of the sharing economy is that anyone can participate and make a difference. No one has to sacrifice their individuality or comfort. Best of all, when we're actively engaged in sharing, personal connections are rekindled and we become invested in our communities again.
