The Architect's Brain: Neuroscience, Creativity, and Architecture Harry Francis Mallgrave

The Architect's Brain: Neuroscience, Creativity, and Architecture is the first book to consider the relationship between the neurosciences and architecture, offering a compelling and provocative study in the field of architectural theory.

- Explores various moments of architectural thought over the last 500 years as a cognitive manifestation of philosophical, psychological, and physiological theory
- Looks at architectural thought through the lens of the remarkable insights of contemporary neuroscience, particularly as they have advanced within the last decade
- Demonstrates the neurological justification for some very timeless architectural ideas, from the multisensory nature of the architectural experience to the essential relationship of ambiguity and metaphor to creative thinking
