Riccardo Casati

Aluminum Matrix Composites Reinforced with Alumina Nanoparticles (SpringerBriefs in Applied Sciences and Technology) Riccardo Casati

This book describes the latest efforts to develop aluminum nanocomposites with enhanced damping and mechanical properties and good workability. The nanocomposites exhibited high strength, improved damping behavior and good ductility, making them suitable for use as wires. Since the production of metal matrix nanocomposites by conventional melting processes is considered extremely problematic (because of the poor wettability of the nanoparticles), different powder metallurgy routes were investigated, including high-energy ball milling and unconventional compaction methods. Special attention was paid to the structural characterization at the micro- and nanoscale, as uniform nanoparticle dispersion in metal matrix is of prime importance. The aluminum nanocomposites displayed an ultrafine microstructure reinforced with alumina nanoparticles produced in situ or added ex situ. The physical, mechanical and functional characteristics of the materials produced were evaluated using different mechanical tests and microstructure investigation techniques. The book presents and discusses the experimental results in detail, and offers suggestions for future research directions.

From reader reviews:

Veronica Roberts:

Now a day people that Living in the era exactly where everything reachable by talk with the internet and the resources included can be true or not demand people to be aware of each details they get. How many people to be smart in getting any information nowadays? Of course the solution is reading a book. Reading a book can help persons out of this uncertainty Information specially this Aluminum Matrix Composites Reinforced with Alumina Nanoparticles (SpringerBriefs in Applied Sciences and Technology) book since this book offers you rich data and knowledge. Of course the data in this book hundred pct guarantees there is no doubt in it everbody knows.

Jessica Wilson:

Is it anyone who having spare time subsequently spend it whole day by watching television programs or just laying on the bed? Do you need something new? This Aluminum Matrix Composites Reinforced with Alumina Nanoparticles (SpringerBriefs in Applied Sciences and Technology) can be the response, oh how comes? The new book you know. You are thus out of date, spending your free time by reading in this fresh era is common not a nerd activity. So what these publications have than the others?

Ernesto Harrell:

Don't be worry if you are afraid that this book will probably filled the space in your house, you will get it in e-book way, more simple and reachable. This Aluminum Matrix Composites Reinforced with Alumina Nanoparticles (SpringerBriefs in Applied Sciences and Technology) can give you a lot of pals because by you investigating this one book you have thing that they don't and make you more like an interesting person. This kind of book can be one of one step for you to get success. This reserve offer you information that might be your friend doesn't recognize, by knowing more than different make you to be great people. So , why hesitate? Let us have Aluminum Matrix Composites Reinforced with Alumina Nanoparticles (SpringerBriefs in Applied Sciences and Technology).

Lindsay Washington:

As a college student exactly feel bored for you to reading. If their teacher requested them to go to the library or make summary for some e-book, they are complained. Just little students that has reading's heart or real their passion. They just do what the professor want, like asked to the library. They go to at this time there but nothing reading critically. Any students feel that looking at is not important, boring and can't see colorful pictures on there. Yeah, it is to become complicated. Book is very important for yourself. As we know that on this age, many ways to get whatever you want. Likewise word says, ways to reach Chinese's country. Therefore , this Aluminum Matrix Composites Reinforced with Alumina Nanoparticles (SpringerBriefs in Applied Sciences and Technology) can make you feel more interested to read.
