How I Built My Own Four-Wheel Bicycle: No welding or machine shop necessary

John Blankenship

How I Built My Own Four-Wheel Bicycle: No welding or machine shop necessary John Blankenship
This attention-getting two-seater was engineered to be built from ONE bicycle, some PVC pipe, and a few miscellaneous parts using typical hand tools many people already have. Use this detailed account of my successes and failures to help you design your own bike. You can spend thousands on a four-wheel commercial bike or you can have the fun of building your own. Sure, you can find plans on the Internet, but the ones I found often required two identical bikes and expensive customized parts from a machine shop (and they still cost more than this book). I will show you how I made mine from a single bicycle I picked up at a yard sale for \$10. You'll find many design and construction hints and suggestions along with 38 full-color pictures to guide you. If you are even thinking about attempting such a project, this book is for you.

From reader reviews:

Lewis Wood:

In this 21st hundred years, people become competitive in each and every way. By being competitive at this point, people have do something to make these individuals survives, being in the middle of the crowded place and notice by means of surrounding. One thing that often many people have underestimated this for a while is reading. Yes, by reading a e-book your ability to survive improve then having chance to stand than other is high. In your case who want to start reading a book, we give you this kind of How I Built My Own Four-Wheel Bicycle: No welding or machine shop necessary book as nice and daily reading guide. Why, because this book is more than just a book.

Shane Bodine:

People live in this new moment of lifestyle always aim to and must have the extra time or they will get large amount of stress from both way of life and work. So , once we ask do people have extra time, we will say absolutely of course. People is human not really a robot. Then we consult again, what kind of activity are there when the spare time coming to you of course your answer will certainly unlimited right. Then do you ever try this one, reading books. It can be your alternative throughout spending your spare time, often the book you have read will be How I Built My Own Four-Wheel Bicycle: No welding or machine shop necessary.

Brent Whitty:

In this period globalization it is important to someone to find information. The information will make professionals understand the condition of the world. The healthiness of the world makes the information much easier to share. You can find a lot of sources to get information example: internet, magazine, book, and soon. You can observe that now, a lot of publisher that will print many kinds of book. Typically the book that recommended for you is How I Built My Own Four-Wheel Bicycle: No welding or machine shop necessary this book consist a lot of the information in the condition of this world now. This book was represented so why is the world has grown up. The language styles that writer make usage of to explain it is easy to understand. The writer made some research when he makes this book. Here is why this book ideal all of you.

Carlos Thornton:

As a university student exactly feel bored to be able to reading. If their teacher inquired them to go to the library or to make summary for some e-book, they are complained. Just small students that has reading's soul or real their hobby. They just do what the trainer want, like asked to go to the library. They go to at this time there but nothing reading very seriously. Any students feel that reading through is not important, boring as well as can't see colorful pictures on there. Yeah, it is to get complicated. Book is very important for you. As we know that on this time, many ways to get whatever we want. Likewise word says, many ways to reach

Chinese's country. So , this How I Built My Own Four-Wheel Bicycle: No welding or machine shop necessary can make you truly feel more interested to read.
