Value Determination of Supply Chain Initiatives: A Quantification Approach Based on Fuzzy Logic and System Dynamics (Supply Chain Management) Philip Wessely

The implementation of supply chain initiatives (SCI) often requires specific investments in technology, material, organization and staff. However, the assessment of the economic viability of such inter-organizational activities is not a trivial issue. Philip Wessely supports managerial decision-making in the forefront of a potential implementation by introducing a quantification approach for the value contributions of SCIs. The resulting approach combines different innovative modeling techniques and considers the individual integration of companies in inter-organizational networks. As a result, it has a broad field of application.
