World's Only Guaranteed Burrowing Pest Elimination Process Moles, Voles, Rats, Gophers, Chipmunks, Snakes, Hedgehogs, and almost any other burrowing pest cannot stay after their tunnels and burrows have been treated with my process. My process is 100% Green, 100% Successful, and 100% Family, Pet, and Planet Friendly. Follow my guidelines and I believe this: This process cannot fail! Have fun taking back and protecting your yards! And remember this, if you are not thrilled with your results, I will simply give your money back. Hello, I'm Butch McGuire. I am a 77 year old retired man living in Snohomish, Washington, USA on a small acreage parcel bordering Lake Beecher. In the summer of 2014, I discovered an effective treatment to rid my property of moles that is completely green and safe. For the past 33 years I've struggled to find a dependable solution lasting more than a couple of weeks. That changed well over a year ago and I now have a completely mole hill free view from my dining room for the first time ever. I started my company, L.R. Butch McGuire LLC, because I want to share this same peace of mind I've found in this discovery with you. Testimonials are normally for customers however, I have had an eye opening experience at my home I want to share with you. It was this experience that caused me to patent this process because it was absolutely astonishing. In my 33 years of living here, I have seen only 2 live moles willingly out on top of the ground. One I flushed out with a full bore garden hose when he was in one of those surface tunnels where they push up the grass, because I was about to drown him, he popped out on top of the ground. After sputtering for a few seconds he then was most interested in distancing himself from the giant with the hose. Our property in Snohomish slopes slightly to the east. The second morning after I discovered my secret sauce worked so well, my bride and I were walking up to the house after checking on the mole hills we had treated the day before. We noticed a new mole hill south of our test area, so we decided to treat it with our new discovery. We flushed some of our stuff down the tunnel and stomped the dirt back into the earth at the site and started again to the house. As we approached the bottom of the steps going up to the house I noticed another mole hill tucked up under an Ivey garden so we treated it also. Now the story gets really interesting! Maybe it was luck, but, there was a mole in the tunnel between where we had just treated below and where we were now treating above. Before we finished treating the hole above, down below where we had treated the other hole a mole launched himself from his tunnel right out on top of the ground in broad open daylight. This, as far as I know, is unheard of. We quickly gathered around the little guy. He was biting at different parts of his body and feet and frantically rolling around on the ground trying to find some relief from the torment he was in. Equally important here is that this little guy was less than interested in the 2 giants standing over him. We were amazed. But it was very apparent the mole was far more interested in what was eating him alive than us. We agreed, we must be onto something far more effective than we had ever dreamed of. Thus, the beginning which lead us to patent our discovery.
