The Population Biology of Tuberculosis (Monographs in Population Biology) Christopher Dye

Despite decades of developments in immunization and drug therapy, tuberculosis remains among the leading causes of human mortality, and no country has successfully eradicated the disease. Reenvisioning tuberculosis from the perspective of population biology, this book examines why the disease is so persistent and what must be done to fight it. Treating tuberculosis and its human hosts as dynamic, interacting populations, Christopher Dye seeks new answers to key questions by drawing on demography, ecology, epidemiology, evolution, and population genetics. Dye uses simple mathematical models to investigate how cases and deaths could be reduced, and how interventions could lead to TB elimination.

Dye's analysis reveals a striking gap between the actual and potential impact of current interventions, especially drug treatment, and he suggests placing more emphasis on early case detection and the treatment of active or incipient tuberculosis. He argues that the response to disappointingly slow rates of disease decline is not to abandon long-established principles of chemotherapy, but to implement them with greater vigor. Summarizing epidemiological insights from population biology, Dye stresses the need to take a more inclusive view of the factors that affect disease, including characteristics of the pathogen, individuals and populations, health care systems, and physical and social environments.

In broadening the horizons of TB research, *The Population Biology of Tuberculosis* demonstrates what must be done to prevent, control, and defeat this global threat in the twenty-first century.

From reader reviews:

Curt Roepke:

Why don't make it to be your habit? Right now, try to prepare your time to do the important behave, like looking for your favorite e-book and reading a e-book. Beside you can solve your trouble; you can add your knowledge by the publication entitled The Population Biology of Tuberculosis (Monographs in Population Biology). Try to the actual book The Population Biology of Tuberculosis (Monographs in Population Biology) as your friend. It means that it can being your friend when you sense alone and beside associated with course make you smarter than in the past. Yeah, it is very fortunated for you personally. The book makes you much more confidence because you can know anything by the book. So , let me make new experience and also knowledge with this book.

Tamika Sheppard:

A lot of people always spent their very own free time to vacation or perhaps go to the outside with them household or their friend. Are you aware? Many a lot of people spent many people free time just watching TV, or maybe playing video games all day long. In order to try to find a new activity honestly, that is look different you can read some sort of book. It is really fun to suit your needs. If you enjoy the book you read you can spent 24 hours a day to reading a book. The book The Population Biology of Tuberculosis (Monographs in Population Biology) it doesn't matter what good to read. There are a lot of people that recommended this book. They were enjoying reading this book. In case you did not have enough space bringing this book you can buy the actual e-book. You can m0ore quickly to read this book from a smart phone. The price is not to cover but this book has high quality.

David Carson:

Reading can called head hangout, why? Because when you find yourself reading a book specially book entitled The Population Biology of Tuberculosis (Monographs in Population Biology) your brain will drift away trough every dimension, wandering in each and every aspect that maybe mysterious for but surely will become your mind friends. Imaging every word written in a publication then become one form conclusion and explanation that will maybe you never get prior to. The The Population Biology of Tuberculosis (Monographs in Population Biology) giving you another experience more than blown away your mind but also giving you useful info for your better life with this era. So now let us show you the relaxing pattern this is your body and mind will be pleased when you are finished reading it, like winning a. Do you want to try this extraordinary wasting spare time activity?

Laura Grier:

In this age globalization it is important to someone to receive information. The information will make professionals understand the condition of the world. The healthiness of the world makes the information quicker to share. You can find a lot of recommendations to get information example: internet, paper, book,

and soon. You will see that now, a lot of publisher that will print many kinds of book. Typically the book that recommended to your account is The Population Biology of Tuberculosis (Monographs in Population Biology) this publication consist a lot of the information from the condition of this world now. That book was represented how does the world has grown up. The terminology styles that writer make usage of to explain it is easy to understand. Typically the writer made some analysis when he makes this book. Honestly, that is why this book suitable all of you.
